

Live Birth Data

Utilization of live birth data is recommended when projecting future enrollments. This provides a helpful overall trend, as well as a useful estimation of kindergarten enrollment five or six years in the future. Large bubbles in birth rates, either up or down, can also be planned for and anticipated by the ACPS.

The following chart lists the live birth rates for the City of Alexandria for the past 15 years. Birth rates peaked in 2000 with 2,432 births recorded, then slightly declined before growing again.

City of Alexandria Live Birth Count 1990-2004	
Year	Total # of Live Births
1990	1,949
1991	1,798
1992	1,900
1993	1,857
1994	1,604
1995	1,842
1996	2,149
1997	2,141
1998	2,110
1999	2,125
2000	2,432
2001	2,424
2002	2,208
