YOUTH RISK BEHAVIOR SURVEY PRELIMINARY REPORT OVERVIEW

Administration of the Youth Risk Behavior Survey (YRBS) was done in collaboration with the City, to collect prevalence data on priority health risk behaviors that contribute to the leading causes of death, disability, and social problems among youth and adults in the United States. These behaviors include: actions that result in unintentional and intentional injuries; tobacco use; alcohol and other drug use; sexual behaviors that result in HIV infection, other sexually-transmitted diseases (STD's), and unintended pregnancies; dietary behaviors; and physical activity, plus overweight and asthma. This was the first administration of the survey to Alexandria youth. Administration occurred during the week of April 16th 2007 with students in grades 7-12; the national YRBS is conducted every two years, during the spring semester, by the Centers for Disease Control (CDC) and provides data representative of 9th-12th grade students in public and private schools throughout the United States. Data are available from 1991-2005; the national 2007 data are not yet available.

The YRBS is an anonymous, self-administered, self-report paper and pencil survey. The high school version of the survey includes 87 questions; the middle school version has 49 questions. The same constructs are covered in both surveys, with the high school version having greater depth of coverage. The number of completed, usable high school surveys was 2,015; 37 surveys were discarded due to greater than 50% of items being missing, having set patterns of responses (e.g., all f's) or excessive extreme responses. The number of completed, usable middle school surveys was 1,202; 25 surveys were discarded for the same reasons detailed above. In addition, editing of individual responses occurred to check for appropriate response range, plausibility, and logical consistency. If responses from two questions conflicted logically, both variables were set to missing. Further, not all students answered all questions, but of the usable surveys, approximately 1-3% of the data were missing from individual items (two items on the high school survey had 10% of the data missing due to logical consistency edits). All usable surveys had a minimum of 50% of the items answered. At least ninety-five percent of the students completed 90% or more of the survey for their grade. Table 1 shows the number of students by school and grade who completed the survey. Also provided in the table is an indication of how much of the student population completed the survey. As can be seen, participation differed by grade and school, with the lowest rate of participation being 70% and the highest 91%. Table 2 presents the demographic characteristics of the sample by survey level. Slightly more females completed the survey and, in general, the race/ethnicity distribution mirrors the ACPS population.

This preliminary report provides a list of all survey items with response option percentages by total sample, gender, grade, and race/ethnicity subgroups. Pages 3-15 present the middle school items; pages 16-42 display the high school items. This level of data is the most detailed and is meant to provide information about common indicators for youth that can be used for needs assessment, planning and development of programs, and evaluation of community health objectives and initiatives. No interpretation of the data is included. A forthcoming report will compare ACPS and national YRBS data (as it becomes available), matched items on the Search PSLAB survey and YRBS survey, and will include more comprehensive statistical tests that examine group differences and co-occurrence of risk behaviors.

Table 1: Participation in the YRBS

	GRADE	N	ENROLLMENT	% OF POPULATION
Francis Hammond	7	318	352	90%
	8	342	377	91%
George Washington	7	276	329	84%
	8	250	320	78%
Minnie Howard	9	500	686	73%
STEP	10	17	--	--
	11	13	--	--
	12	12	--	--
TC Williams	9	13	21	62%
	10	573	705	84%
	11	509	641	81%
	12	370	562	70%

^a Separate enrollment data is not available for STEP. STEP and TCW participation numbers are combined to determine % of population participation for grades 10, 11 and 12.

Table 2: Demographic Characteristics of Students Participating in the YRBS

		MIDDLE SCHOOL		HIGH SCHOOL	
		Number ^a	Percent	Number ^a	Percent
Gender	Male	569	48%	937	47%
	Female	613	52%	1055	53%
Race/ Ethnicity	Asian	83	7%	127	6%
	Hispanic	344	29%	518	26%
	Black	469	39%	718	36%
	White	191	16%	441	22%
	Other	115	9%	211	10%
Grade	7	594	50%	--	--
	8	592	50%	--	--
	9	--	--	513	26%
	10	--	--	590	29%
	11	--	--	522	26%
	12	--	--	382	19%
Total		1202		2015	

^a Due to missing data, the numbers will not always sum to the total sample size. Percentages were calculated based on number of respondents answering the question
